

GOEBEL

Concepta

substrates:	paper, labels
substrate range:	28 – 250g/m ² (web length zero: 40-170g/m ²)
web width:	520
size range:	14" – 28 1/3" (special sizes on request)
printing technologies:	based on size variable cassettes: wet offset-, dry offset and flexo printing; numbering, letterpress, security imprinting
processing cassettes:	plus integrable aggregates: flexo printing, silk screen printing, inkjet
converting mode:	die cutting, cross perforation, sprocket-hole – and file-hole punching
curing technology:	reel to reel, reel to sheet, reel to fold
drive system:	UV
applications:	shaft driven
OEM equipment:	traditional printing, mailings, security printing, pharma printing, labels, tickets, advertising supplements, forms and sheet products (A4)
	remote ink key control
	register control system
	web video system
	100% inspection
	Silk screen unit, Flexo unit, Inkjet

Economic alternative to shaft less driven machines.
With optional separate drive, make-ready can be done for each printing unit independently.
Modular system with versatile printing and finishing capabilities.
